101's Positive Statement

The method claims expressly a tie to an “automated processing system” which can be interpreted by one of an ordinary skill in the art as either hardware or software. However, the nature of the operation performed by the method are such that they cannot be readily implemented manually or mentally to achieve the disclosed utility of the invention. Additionally, the concepts of recognizing human’s eyes, cropping images, masking, normalizing ...etc require a combination between hardware (particular machines such as camera and computer) and software in order to perform such functions (see Specification, [0065]). Thus, the method claims are interpreted to tie to a particular machine.

REASONS FOR ALLOWANCE

1. The following is an examiner’s statement of reasons for allowance:

Regarding independent claims 1 and 10, the prior art of records do not show the limitations of a face prototype synthesis method that creates cropped images, creates face prototype images and warping mask images as specifically claim and in combination with other limitations of the claims.

Other claims are allowed because they depend on the independent claims.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
